## Urnik Cloud

At Urnik, we will offer virtual private cloud services coupled with our Urnik Connect managed SD-WAN service. We believe that connectivity to cloud environments, public or private is properly secured and isolated using an SD-WAN solution.

**User interface:** Urnik Cloud provides a standardized, user friendly experience user interface to end user. It also provides role based access to customers.

**Automation of procedures:** Urnik Cloud is based on the automation of the common tasks enabling the users, possessing minimal knowledge, can interact with it in a seamless manner.

**Orchestration:** At Urnik, We decreased the human intervention through the means of orchestration. This was possible by providing a single click solution that performs background tasks to which users are normally indifferent.

**Structured deployment of resources:** Urnik Cloud houses the feature of structured resource deployment i.e. the users can opt to commission their infrastructure.

**Service Management:** At Urnik, we have a special service management suite to handle all the process involved in rolling out our services. This especially includes the ITIL modules. By following the best practices ITIL outlines for your IT functions, we'll reduce your overhead, improve the quality of service, and help your business to grow.

## How does Uurnik Cloud deliver as per your needs?

### Cloud Services coupled with SD-WAN

At Uurnik, we offer virtual private cloud services coupled with our Uurnik Connect managed SD-WAN service. We believe that connectivity to cloud environments, public or private is properly secured and isolated using an SD-WAN solution.
